This product requires that you use a high-gain roof antenna to enable and enjoy reliable Digital Television reception throughout the France. The portable antenna that we provide should only be used and relied on in areas where the Digital TV signal reception is optimal. (Some countries or regions can have different reception conditions, and the environment in which you are viewing can

be affected by various factors: Proximity to the Digital TV transmitter, heavy/ tall building constructions and thick walls or ceilings.) Portable or mobile Digital TV reception in cars, trains or airplanes etc. is normally not supported.

Package including:
(1) One HDMI 19Pin splitter cable

Note:
1.Please turn on the HDMI displays one after another, not to turn on 2 HDMI displays at the same time.
2.You can't connect two input device (i.e. PC,DVD player,cable box or satellite receiver) to one output device(i.e. Monitor, TV or projector) .
3. Due to the current state of the technology, results using HDMI and DVI splitters can be mixed. Especially passive splitters which rely on the individual devices ability to negotiate a 3 way handshake. The problem is not all devices are programmed to deal with this properly and will sometimes default to a HDCP error state. To put it simply, some devices will consider the splitting of a signal to be a copyright violation, which could result in only one display being shown at a time or the blocking of content altogether. This type of situation is considered to be a device compatibility issue and can not be fixed short of a firmware update by the individual device manufacturers. Before purchasing this splitter, please be advised that we have no control over nor are we responsible for compatibility issues (including HDCP issues).

This product is a handed-size universal VGA to TV, HDTV, and Plasma TV converter box. Convert your VGA signal to be viewed on any TV, projector, or any other viewing device that uses standard TV connectors with this simple external device. Converts a VGA signal into an S-Video or RCA signal – use your TV as a PC monitor, great for presentations, web-browsing, PC online games, pictures, and movies.

Easy use--Connecting this conversion box to your video configuration takes only a couple minutes.

This PC to TV converter also features a VGA output port that allows for VGA Loop-Through. This essentially means that you can simultaneously view video on a VGA monitor while viewing the video on your TV, projector, etc.
